

Sustainable-Innovator-Certificate

The sustainability analysis of the patent portfolio allows insight into the sustainability-objectives of each innovative corporation filing patents. This indicates its sustainable future plan.

Based on the patent portfolio of

TESLA INC

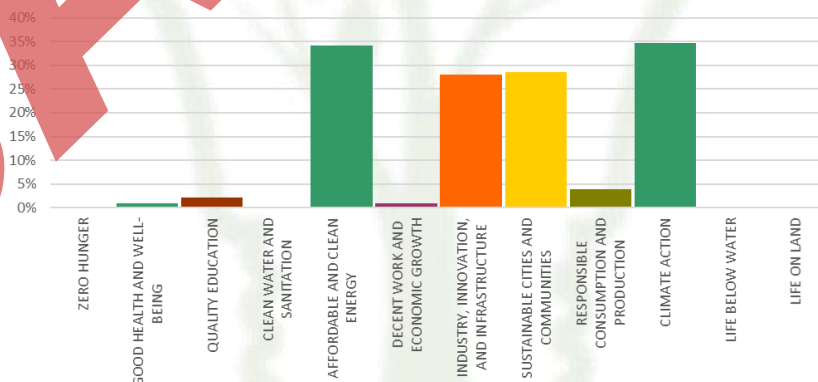

TESLA

the sustainability-analysis shows the following result:

Total Environment Score: 41%
(benchmark-highest in sector)

Sector-average: 15,5%

Sustainable Development Goals Profile

The analysis was done by evaluating the whole patent portfolio including a qualitative and monetary valuation. The SDG analysis was done by assigning all patents to the 17 Sustainable Development Goals published by the United Nations (UN SDG), whereas 12 can be addressed with patents in general. For the Environment score the value of all sustainable patents was divided by the total portfolio value and compared to a sector average.
